

Request for Java Script replacement

January 2020

When using the Star webPRNT browser for iOS

We plan to release Star webPRNT browser with WKWebview (component that displays web pages) which is recommended by Apple, in June 2020.

To use WKWebview version, JavaScript for Star webPRNT will need to be updated.

Please replace StarWebPrintTrader.js with Ver1.0.1 or later and StarWebPrintExtManager.js with Ver1.2.0 or later.

Old JavaScript cannot be used with WKWebview.

You can use StarWebPrintTrader.js Ver1.0.1 or later and StarWebPrintExtManager.js Ver1.2.0 or later without problem

with the current Star webPRNT browser.

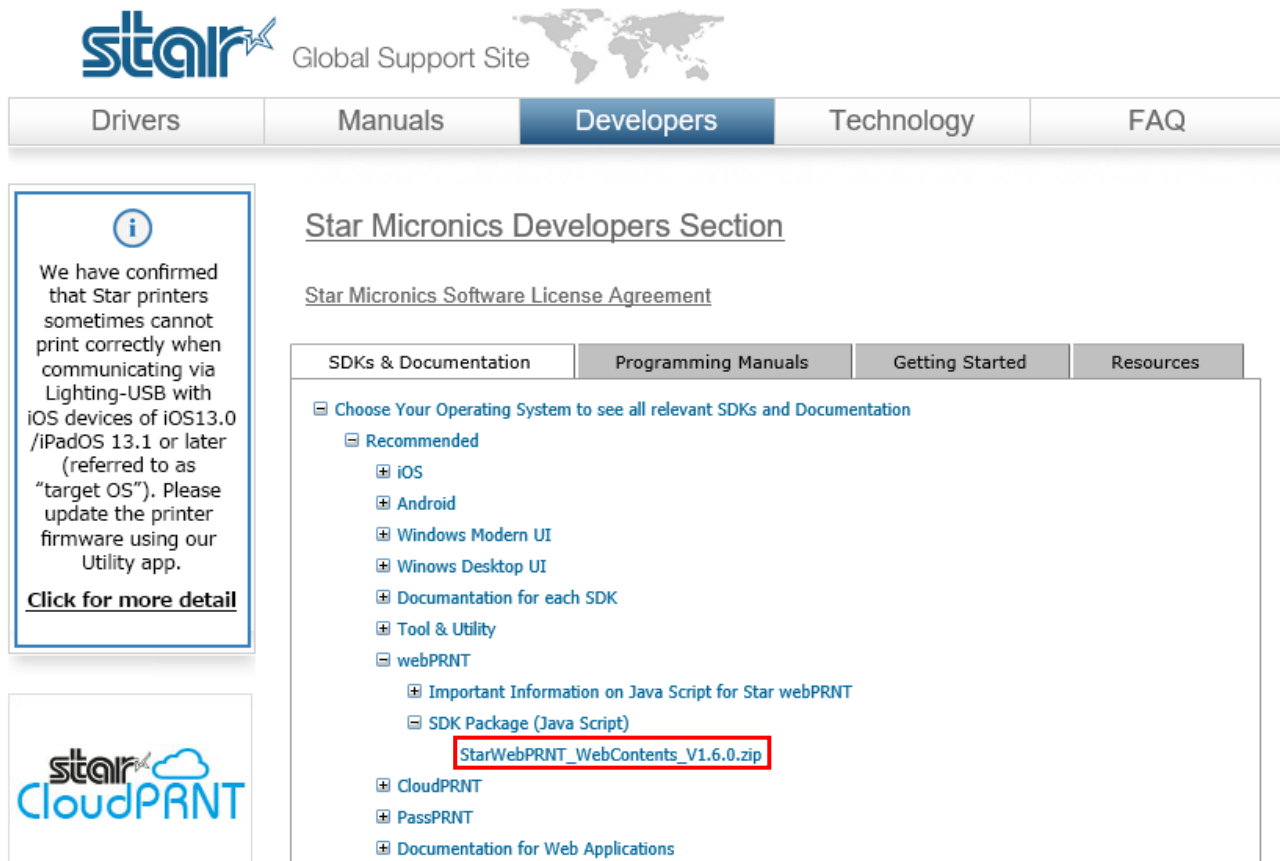

Note: StarWebPrintTrader.js Ver1.0.1 and StarWebPrintExtManager.js Ver1.2.0 are included in StarWebPRNT_WebContents_V1.6.0.zip.

● JavaScript replacement procedure

1. Download StarWebPRNT_WebContents_V1.6.0.zip from Star Global Support Site and unzip it.
